- **News Portal with Laravel**

This is a news website built with **Laravel** with beautiful user interface designed in **Bootstrap**. It is very useful website with modern design and features. It uses an API to fetch news data from and displays it on our site with most elegant way.

- **Restaurant Website with Laravel**

This is a website for restaurants to promote their business. It is built using **Laravel Framework** and is fully responsive with amazing features.

- **Weather Application**

This is a JavaScript Weather Application designed with bootstrap. It fetches weather data from Dark Sky API to show on our site. It is very useful site which can be further improved by adding more features and designs elements to it.

- **Personal Portfolio Website**

This is my portfolio website that I have built using Bootstrap with beautiful design. It is fully responsive site.
